PUSH FOR TRANSITION TO ZERO EMISSIONS HEAVY DUTY VEHICLES

The Netherlands, Belgium, Denmark and Luxembourg have published a joint non-paper calling for an ambitious revision of the emission standards for heavy duty vehicles (HDVs) which they consider to be much needed to contribute to a reduction of the emissions of road transport in line with the Paris Agreement, the European Climate Law and Member States targets under the Effort Sharing Regulation (ESR).

TRANSITION TO SAF RAISES INVESTMENTS DEBATE

At the Airline Economics conference in Dublin, which brings together the world's largest aircraft owners, it was agreed that greener fuel was the only way for airlines to meet strict global carbon emission targets. Sustainable aviation fuels (SAFs) rely on feedstocks to reduce emissions by up to 80% from conventional fuel.

ITF STUDY ON THE POTENTIAL OF E-FUELS TO DECARBONISE SHIPS AND AIRCRAFT

On 24 January, the International Transport Forum published a study on the potential of e-fuels to decarbonise long-haul aviation and maritime shipping. The report analyses how E-fuels - like hydrogen, ammonia, e-methanol or e-kerosene - can be produced from renewable energy and feedstocks in ways that are cheaper and maximise emissions cuts without direct electrification.
